Xiucheng "Andy" Zhang

Tel: (+1)5516896821 | Email: xz5473@nyu.edu | Add: 180 Morgan Steet #2404, Jersey City, NJ 07302

Education Background

New York University New York, U.S.
M.S. in Computer Science (Courant Institute of Mathematical Sciences) 09/2025 -- 05/2027

Sun Yat-sen University Guangzhou, China
B.S. in Artificial Intelligence 09/2021 -- 06/2025

- GPA: 3.9 / 4.0
- Core Courses: Data Structure and Algorithm; Machine Learning; Natural Language Processing

Research Experience

Research Intern | Hong Kong University of Science and Technology
Context-aware Cognitive Architecture for Task Planning 05/2024 -- 09/2024

- Designed a dual-process generative reasoning architecture integrating a weighted affordance knowledge graph with a context-aware RAG-enhanced LLM, enabling structured and human-compatible planning under dynamic environments.
- Developed a probabilistic KG–LLM hybrid scoring mechanism with multimodal grounding, achieving 98.78% execution disambiguity and outperforming LLM-only baselines in contextual acceptability.

Research Intern | Sun Yat-sen University
Domain-Specific Retrieval-Augmented Generation for Medical QA 05/2024 -- 09/2024

- Constructed a domain-adaptive RAG framework by curating 10k+ medical community posts into a structured knowledge base, optimizing dense retrieval and prompt grounding for high-risk medical queries.

***DesignWatch*: Multimodal Analysis & Evaluation of Mobile App Usability** 10/2023 -- 04/2024

- Developed *DesignWatch*, an interactive tool that extracts users' operation paths from mobile app screen recordings via ResNet-18 key-frame extraction and prompts GPT-4V to simulate users' thought processes during UI transitions, enabling designers to visualize cross-user operation patterns.
- Collected data from 20 participants across 12 apps and evaluated the system with four UX designers; the mixed-method study demonstrated that *DesignWatch* reduces manual review time and helps identify usability issues and optimization opportunities for commercial mobile products.

***LSCD-TTA*: Remote Sensing Image Classification** 10/2023 -- 08/2024

- Led the experimental evaluation and ablation analyses of LSCD-TTA across six cross-domain tasks on AID, NWPU-RESISC45, and UC Merced datasets. The experiments showed that LSCD-TTA improves average accuracy by 4.99 % on ResNet-50, 5.22 % on ResNet-101, and 2.37 % on ViT-B/16, while maintaining real-time inference at approximately 2.65 ms per image.

Professional Experience

NLP Algorithm Engineer Intern | Shanghai Xijin Information Technology Co., Ltd. 07/2023 -- 09/2023

- Contributed to the prompt engineering of a pre-trained large language model for a customer service Q&A agent, iterating prompt templates to improve response quality and adapt the model to the company's knowledge base.
- Collaborated in an Agile workflow, developing preprocessing pipelines for file conversion and text segmentation, and delivering APIs to streamline document processing.

Publications

CHI 2025 - *ACKnowledge: A Computational Framework for Human Compatible Affordance-based Interaction Planning in Real-world Contexts.* (Co-author)

MobileHCI 2024 - *DesignWatch: Analyzing Users' Operations of Mobile Apps Based on Screen Recordings.* (First author)

JAG (Remote Sensing Journal) - *Low Saturation Confidence Distribution-based Test-Time Adaptation for Cross-Domain Remote Sensing Image Classification.* (Co-author)

Extracurricular Experience

Club President | School of Artificial Intelligence Youth Media Center 10/2022 -- 03/2024

- Wrote and starred in a campus micro-film themed around 'Carpe Diem', achieving 10k+ views across platforms.
- Led a team during the university's robotics competition to produce promotional videos and conduct interviews
